## ASSET ALLOCATION

## INVESTMENT STRATEGY

WBI Global Tactical Rotation is designed to use several methods to identify and allocate among investment opportunities, while seeking to provide a responsive, risk-managed approach to investing across a broad universe of assets. Exchange Traded Funds (ETFs) are used to provide access to investments in any global asset class, geographic region, country, index, sector, industry, equity style or market capitalization. The portfolio also uses dividend-paying stocks in an attempt to capitalize on the advantages we believe dividends can offer.

WBI is an independent, privately owned investment management firm that is registered as an investment advisor with the U.S. Securities and Exchange Commission (SEC) and provides discretionary investment management to individuals, pension and profit sharing plans, charitable organizations, corporations, and other entities. WBI claims compliance with the Global Investment Performance Standards (GIPS®).

The Global Tactical Rotation strategy is designed to provide a responsive, risk-managed, value-oriented approach to investing across a broad universe of assets, while also seeking to protect principal during unfavorable market conditions. ETFs are used to provide access to domestic and international equities, classified by company size, growth or value characteristics, and industry groups. ETFs are also used for access to various fixed-income markets, commodities, and hedging, or other strategies. Individual dividend-paying stocks are also used. It is actively managed in an attempt to respond to changing conditions and, depending on market conditions, it may hold a significant allocation to cash equivalents. The inception date of the strategy is August 1992 and the composite creation date is May 2009. The strategy was formally known as: Tactical ETF Plus (Jun 2015-Feb 2016); ETF Plus (Sept 2014-May 2015 & prior to Jan 2014); Absolute Return ETF Plus (Jan 2014-Aug 2014); and Moderate Total Return (prior to Nov 2010). The composite includes all discretionary accounts for which the client has selected the Global Tactical Rotation strategy model as the objective. A complete list, description, and GIPS compliant presentation is available for all composites by emailing [WBIMarketing@wbiinvestments.com](mailto:WBIMarketing@wbiinvestments.com).

## IMPORTANT INFORMATION

**Past performance does not guarantee future results**. This is not an offer to buy or sell any security. No security or strategy, including those referred to directly or indirectly in this document, is suitable for all accounts or profitable all of the time and there is always the possibility of loss. You should not assume that any discussion or information provided here serves as a substitute for personalized investment advice from WBI or from any other investment professional. If you have any questions regarding the applicability of specific issues discussed to your individual situation, please consult with WBI or your chosen professional advisor. This information is compiled from sources believed to be reliable, accuracy cannot be guaranteed. Information pertaining to WBI's advisory operations, services, and fees is set forth in WBI's Form ADV Brochure, a copy of which is available upon request.

Net of Fee Performance (NFP) is net of WBI's investment management fees and includes reinvestment of dividends and other earnings. Gross of Fee Performance is presented for comparison of manager performance, and excludes the effects of the investment management fees charged by WBI.

The Morningstar Overall Rating is based off of the weighted average of Morningstar Risk-Adjusted Return ratings for the three, five, and ten-year periods. The rating methodology is based on a one- to five-star scale following a bell curve: 1 star the lowest 10%, 5 stars the highest 10%, and 3 stars falling in the middle 35%. **Tactical Allocation:** Portfolios seek to provide capital appreciation and income by actively shifting allocations between asset classes. Must historically demonstrate material shifts within the primary asset classes either through a gradual shift over three years or through a series of material shifts on a quarterly basis. Cumulative asset class exposure changes must exceed 10% over the measurement period. The Morningstar Rating is based on past performance and not indicative of future performance. © 2017 Morningstar. All Rights Reserved. The information contained herein: 1) is proprietary to Morningstar and/or its content providers; 2) may not be copied or distributed; and 3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

**Alpha:** measure of risk-adjusted non-excess return; positive Alpha indicates better performance than the given Beta (volatility) of the investment. **Beta:** measure of volatility relative to an index; Beta above 1 is more volatile than the index; Beta less than 1 is less volatile. **Up and Down Capture Ratios** are used to evaluate how well a manager performed relative to an index during periods when the index is up or down. **Maximum Drawdown:** measures peak-to-trough loss of an investment, indicating capital preservation. **Standard Deviation:** measure of volatility; greater STD indicates a more volatile strategy or index during a given time period. **MSCI World TR Gross Index:** captures large and mid-cap representation of 23 developed markets with 1,653 constituents, covering approximately 85% of free-float capitalization of each country. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This report is not approved, endorsed, reviewed, or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

Benchmark performance does not include the deduction of transaction and custodial charges, or the deduction of an investment management fee, which would likely reduce indicated historical performance results. Because the strategy involves active management of a potentially wide range of assets, no widely recognized benchmark is likely to be representative of the performance of any managed account. Therefore, WBI managed accounts may own assets and follow investment strategies which cause them to differ materially from the composition and performance of the benchmarks shown on performance or other reports. Benchmark indices are unmanaged and may not be invested in directly.
