INVESTMENT STRATEGY

WBI Tactical Dividend Growth Enhanced is designed for moderately aggressive investors and utilizes affiliated Exchange-Traded Funds (ETFs) to create an equity-focused allocation. WBI adjusts the allocation among the ETFs as conditions change in an effort to pursue capital appreciation or protect capital as risk increases. The strategy can be used as a moderately aggressive core allocation positioned for risk-managed growth of capital.

Important Information: Performance is that of the Tactical Dividend Growth Composite. Prior to 8/25/2014, the Composite only included accounts invested in a model allocated to individual securities. On 8/25/2014, the Composite added a second model of accounts invested in an allocation to 10 Affiliated ETFs (the "Initial ETFs"). When a new Affiliated ETF is launched a new model reflecting accounts invested in the full suite of Affiliated ETFs is included in the Composite. Effective 7/25/16 and 1/06/17, models with accounts invested in 11 and 12 Affiliated ETFs respectively, were included in the Composite. The model implemented through the use of individual securities and the models implemented through Affiliated ETFs are substantially similar. The Affiliated ETFs do not have performance history of comparable duration; therefore, performance of the models implemented through Affiliated ETFs could have been better or worse over the same period and is not indicative of future performance.

Please see "Important Performance Information" on the front page regarding this performance illustration.

WBI is an independent, privately owned investment management firm that is registered as an investment advisor with the U.S. Securities and Exchange Commission (SEC) and provides discretionary investment management to individuals, pension and profit sharing plans, charitable organizations, corporations, and other entities. WBI claims compliance with the Global Investment Performance Standards (GIPS®).

The Tactical Dividend Growth Strategy pursues long-term growth of capital by focusing on stocks and American Depositary Receipts (ADRs) that offer dividends as part of their total return. It may also use ETFs to gain exposure to other types of investments or asset classes. It is actively managed in an attempt to respond to changing conditions and, depending on market conditions, it may hold a significant allocation to cash equivalents. The inception date of the strategy is June 2008 and the composite creation date is May 2009. The strategy was formally known as: Dividend Growth (Sept 2014-May 2015 & prior to Jan 2014); and Absolute Return Dividend Growth (Jan 2014-Aug 2014). The composite includes all discretionary accounts for which the client has selected the Tactical Dividend Growth strategy model as the objective. Prior to September 2014, the Tactical Dividend Growth composite only included accounts invested in unaffiliated, individual securities. Starting September 2014, the composite includes both accounts that are invested in unaffiliated, individual securities, as well as accounts that are invested predominantly in affiliated ETFs. While the affiliated ETFs may allow for indirect exposure to certain investment products which might otherwise not be utilized, the use of ETFs as opposed to individual securities does not represent a material change in the underlying investment strategy associated with the composite. Accordingly, both types of accounts meet the definition of the composite and are, therefore, included in the composite. A complete list, description, and GIPS compliant presentation is available for all composites by emailing WBIMarketing@wbiinvestments.com.

IMPORTANT INFORMATION

Past performance does not guarantee future results. This is not an offer to buy or sell any security. No security or strategy, including those referred to directly or indirectly in this document, is suitable for all accounts or profitable all of the time and there is always the possibility of loss. WBI Enhanced SMA® Program accounts are subject to investment risk, including the possible loss of principal amount invested. The ETFs used in WBI Enhanced SMA Program accounts may invest in other ETFs, mutual funds, and Exchange-Traded Notes (ETNs) which will subject the account to related additional expenses of each, and the risk of owning the underlying securities held by each. Investment risks may include but are not limited to: market, economic, political, interest rate, currency exchange, leverage, liquidity, credit quality, model, portfolio turnover, trading, REIT, high yield stocks, nondiversification, concentration, commodities, options, new fund, and client specific restrictions. Passive ETFs are not actively managed and the Sub-Advisor does not attempt to take defensive positions in declining markets. You should not assume that any discussion or information provided here serves as a substitute for personalized investment advice from WBI or from any other investment professional. If you have any questions regarding the applicability of specific issues discussed to your individual situation, please consult with WBI or your chosen professional advisor. This information is compiled from sources believed to be reliable, accuracy cannot be guaranteed. Information pertaining to WBI's advisory operations, services, and fees is set forth in WBI's Form ADV Brochure, a copy of which is available upon request.

WBI has an inherent conflict of interest in investing in or recommending Affiliated ETFs as follows: 1) WBI and its affiliates receive management fees from Affiliated ETFs. To avoid receiving two layers of management fees in those situations where clients invest in Affiliated ETFs through SMA and Platform accounts, WBI will either: (i) waive the management fee charged at the account level; or (ii) credit the portion of the management fees paid by the Affiliated ETFs to WBI and its affiliates with respect to an account's investments in Affiliated ETFs against the account-level advisory fees the account owes WBI, and 2) WBI's affiliated broker-dealer, Millington Securities, Inc., receives commissions and other compensation (including payment for order flow) for transactions effected on behalf of the Affiliated ETFs. Trades WBI places through Millington will be subject to WBI's duty of best execution and applicable law.

Net of Fee Performance (NFP) is net of WBI's investment management fees and includes reinvestment of dividends and other earnings. Both NFP and Gross of Fee Performance (GFP) were restated effective February 28, 2017, to reflect the exclusion of management fees paid by the Affiliated ETFs to WBI held through the WBI Enhanced SMA® accounts which resulted in understating GFP, and as a result, NFP. Additional information is available upon request.

Benchmark performance does not include the deduction of transaction and custodial charges, or the deduction of an investment management fee, which would likely reduce indicated historical performance results. Because the strategy involves active management of a potentially wide range of assets, no widely recognized benchmark is likely to be representative of the performance of any managed account. Therefore, WBI managed accounts may own assets and follow investment strategies which cause them to differ materially from the composition and performance of the benchmarks shown on performance or other reports. Benchmark indices are unmanaged and may not be invested in directly.

Alpha: measure of risk-adjusted non-excess return; positive Alpha indicates better performance than the given Beta (volatility) of the investment. **Beta**: measure of volatility relative to an index; Beta above 1 is more volatile than the index; Beta less than 1 is less volatile. **Up and Down Capture Ratios** are used to evaluate how well a manager performed relative to an index during periods when the index is up or down. **Maximum Drawdown**: measures peak-to-trough loss of an investment, indicating capital preservation. **Standard Deviation**: measure of volatility; greater STD indicates a more volatile strategy or index during a given time period. **MSCI World TR Gross Index**: captures large and mid-cap representation of 23 developed markets with 1,653 constituents, covering approximately 85% of free-float capitalization of each country. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This report is not approved, endorsed, reviewed, or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.
