Strategy Assets	\$ 252,500,000
Firm Total Assets	\$ 1,570,300,000

## INVESTMENT STRATEGY

WBI Tactical Dividend Income is designed to be a global allocation of high-yield dividend stocks. It is intended to be used as a moderate allocation for long-term growth of capital.

Performance shown is composite performance which, prior to 8/25/14, only included accounts invested in a model allocated to individual securities. When an Affiliated ETF is launched, a new model reflecting accounts invested in the full suite of Affiliated ETFs is included in the Composite. Models implemented through Affiliated ETFs were added on 8/25/14 (the initial 10 ETFs), 7/25/16 (11 ETFs) and 1/06/17 (12 ETFs). The model implemented through individual securities and the models implemented through Affiliated ETFs are substantially similar. The Affiliated ETFs do not have performance history of comparable duration; therefore, models implemented through Affiliated ETFs could have performed better or worse over the same period and does not indicate future performance.

Tactical Dividend Income (gross)	-2.00	7.87	4.57	6.41	—	7.62
Russell 3000 Value	-2.82	6.81	10.71	7.84	9.79	8.76

Please see "Important Performance Information" on the front page regarding this performance illustration.

WBI is an independent, privately owned investment management firm that is registered as an investment advisor with the U.S. Securities and Exchange Commission (SEC) and provides discretionary investment management to individuals, pension and profit sharing plans, charitable organizations, corporations, and other entities. WBI claims compliance with the Global Investment Performance Standards (GIPS®).

The Tactical Dividend Income Strategy focuses on dividend-paying stocks that offer dividend yields higher than those of a broad market index such as the S&P 500. Dividend-paying American Depositary Receipts (ADRs) may also be used in the strategy's allocation. It may also use ETFs to gain exposure to other types of investments or asset classes. It is actively managed in an attempt to respond to changing conditions and, depending on market conditions, may hold a significant allocation to cash equivalents. The inception date of the strategy is June 2003 and the composite creation date is May 2009. The strategy was formally known as: Dividend Income (Sept 2014-May 2015 & prior to Jan 2014); Absolute Return Dividend Income (Jan 2014-Aug 2014); and Dividend Growth & Income (prior to Nov 2010). The composite includes all discretionary accounts for which the client has selected the Tactical Dividend Income strategy model as the objective. Prior to September 2014, the Tactical Dividend Income composite only included accounts invested in unaffiliated, individual securities. Starting September 2014, the composite includes both accounts that are invested in unaffiliated, individual securities, as well as accounts that are invested predominantly in affiliated ETFs. While the affiliated ETFs may allow for indirect exposure to certain investment products which might otherwise not be utilized, the use of ETFs as opposed to individual securities does not represent a material change in the underlying investment strategy associated with the composite. Accordingly, both types of accounts meet the definition of the composite and are, therefore, included in the composite. A complete list, description, and GIPS compliant presentation is available for all composites by emailing [WBIMarketing@wbiinvestments.com](mailto:WBIMarketing@wbiinvestments.com).

Effective 1/1/2018, the benchmark for the Tactical Dividend Income changed to Russell 3000 Value TR Index. The previous benchmark was MSCI World Gross Index.

## IMPORTANT INFORMATION

**Past performance does not guarantee future results**. This is not an offer to buy or sell any security. No security or strategy, including those referred to directly or indirectly in this document, is suitable for all accounts or profitable all of the time and there is always the possibility of loss. You should not assume that any discussion or information provided here serves as a substitute for personalized investment advice from WBI or from any other investment professional. If you have any questions regarding the applicability of specific issues discussed to your individual situation, please consult with WBI or your chosen professional advisor. This information is compiled from sources believed to be reliable, accuracy cannot be guaranteed. Information pertaining to WBI's advisory operations, services, and fees is set forth in WBI's Form ADV Brochure, a copy of which is available upon request.

Net of Fee Performance (NFP) is net of WBI's investment management fees and includes reinvestment of dividends and other earnings. Gross of Fee Performance is presented for comparison of manager performance, and excludes the effects of the investment management fees charged by WBI.

Benchmark performance does not include deductions of transaction and custodial charges or investment management fees, which would likely reduce performance results. Because the strategy involves active management of a potentially wide range of assets, no widely recognized benchmark is likely to represent performance of any managed account. WBI managed accounts may own assets and follow investment strategies which cause them to differ materially from the composition and performance of the benchmarks shown. Indices are unmanaged and may not be invested in directly.

**Alpha**: measure of risk-adjusted non-excess return; positive Alpha indicates better performance than the given Beta (volatility) of the investment. **Beta**: measure of volatility relative to an index; Beta above 1 is more volatile than the index; Beta less than 1 is less volatile. **Up and Down Capture Ratio s**: used to evaluate how well a manager performed relative to an index during periods when the index is up or down. **Maximum Drawdown**: measures peak-to-trough loss of an investment, indicating capital preservation. **Standard Deviation**: measure of volatility; greater STD indicates a more volatile strategy or index during a given time period. **Russell 3000 Value TR Index**: comprised of Russell 3000 companies with lower predicted and historical growth rates.
