

SMALL ACCOUNT PROGRAM

WBI OFFERS 5 DIFFERENT STRATEGIES

\$10K
Minimum Initial Investment

Less Risk

More Risk

Worried about markets? Excited about markets?

We offer five Small Account strategies based on your risk-reward ratio.

Balanced	100% WBI Balanced Enhanced SA
Bear Blend	75% WBI Balanced Enhanced SA 25% WBI Dividend Growth Enhanced SA
Bull Bear Blend	50% WBI Balanced Enhanced SA 50% WBI Dividend Growth Enhanced SA
Bull Blend	25% WBI Balanced Enhanced SA 75% WBI Dividend Growth Enhanced SA
Dividend Growth	100% WBI Dividend Growth Enhanced SA

Following the initial investments in the account, investments will be allocated quarterly. Strategy changes will be permitted once a year. This, together with account size, and/or redemption requests/withdrawals, may cause WBI to allocate Account assets in a manner which is different from other accounts managed to the same or similar strategy or strategies. These considerations may cause one account to reflect implementation of the strategies in different increments or on a different basis than other accounts managed to the same or a similar strategy. If you remain invested in cash and/or cash alternatives over time, you should consider whether an advisory program continues to be suitable for you. Any investment involves risk, including possible loss of principal.

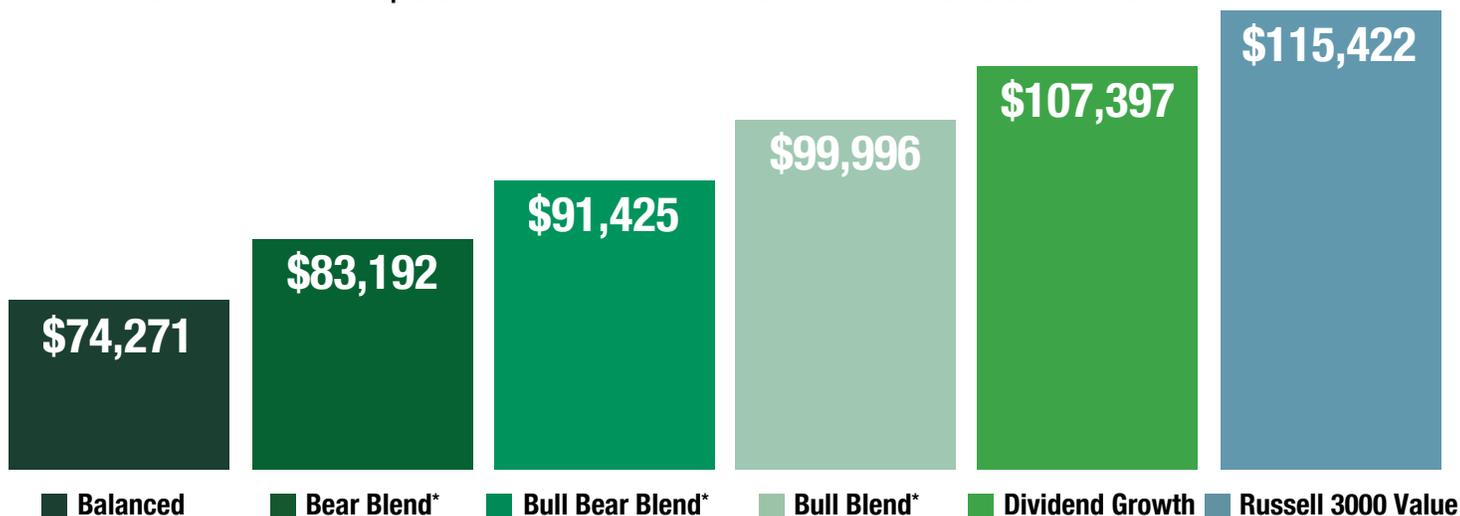

OUTCOME ORIENTED INVESTING

Unique Structure Provides Diversification, Risk Management & Tax Efficiency

Time-Tested Investment Process

Outstanding Back-Office Support

HYPOTHETICAL \$50K INITIAL INVESTMENT 6/30/2008-12/31/2017

Russell 3000 Value Index	9.21	-38.99	100.00	100.00	1.00

Source: Morningstar, 2018, Net of Fee.

*Hypothetical model performance based off WBI's Tactical Balanced and Tactical Dividend Growth actual composite performance. Tactical Balanced Inception: 8/31/1992. Tactical Dividend Growth Inception: 6/30/2008.

The Balanced and Dividend Growth performance is that of the Tactical Balanced and Tactical Dividend Growth Composites, comprised of three Tactical Balanced and Tactical Dividend Growth model strategies. Prior to 8/25/2014, the Composite only included accounts invested in a model allocated to individual securities. On 8/25/2014, the Composite added a second model of accounts invested in an allocation to 10 Affiliated ETFs (the "Initial ETFs"). When a new Affiliated ETF is launched a new model reflecting accounts invested in the full suite of Affiliated ETFs is included in the Composite. Effective 7/25/16 and 1/06/17, models with accounts invested in 11 and 12 Affiliated ETFs respectively, were included in the Composite. The model implemented through the use of individual securities and the models implemented through Affiliated ETFs are substantially similar. The Affiliated ETFs do not have performance history of comparable duration; therefore, performance of the models implemented through Affiliated ETFs could have been better or worse over the same period and is not indicative of future performance. **While blends shown were investable by component prior to November 2016, the blends were not offered as a standard strategy offering and the historical performance is calculated based on existing composite performance of each component strategy.** Additional performance information available upon request for Tactical Balanced and Tactical Dividend Growth, however no accounts prior to November 2016 were managed in the above listed blends.

IMPORTANT INFORMATION

Past performance does not guarantee future results. This is not an offer to buy or sell any security. No security or strategy, including those referred to directly or indirectly, is suitable for all accounts or profitable all the time. WBI Enhanced SMA® accounts are subject to investment risk, including the possible loss of principal. The ETFs in WBI Enhanced SMA accounts may invest in other ETFs, mutual funds, and Exchange-Traded Notes (ETNs) which will subject the account to related additional expenses of each, and the risk of owning the underlying securities held by each. Investment risks may include but are not limited to: market, economic, political, interest rate, currency exchange, leverage, liquidity, credit quality, model, portfolio turnover, trading, REIT, high yield stocks, nondiversification, concentration, commodities, options, new fund, and client specific restrictions. WBI's Passive ETFs are not actively managed and WBI does not attempt to take defensive positions in declining markets. You should not assume that any discussion or information provided here serves as a substitute for personalized investment advice from WBI or any other investment professional. If you have questions regarding the applicability of specific issues discussed to your individual situation, please consult with WBI or your chosen professional advisor. This information is compiled from sources believed to be reliable, accuracy cannot be guaranteed. WBI's advisory operations, services, and fees are in the Form ADV, available upon request.

This material has been prepared for informational purposes only, and is not intended to provide, and should not be relied on for tax, legal, or accounting advice. You should consult your own tax, legal, and accounting advisors before engaging in any transaction.

WBI has an inherent conflict of interest in investing in or recommending Affiliated ETFs as follows: 1) WBI and affiliates receive management fees from Affiliated ETFs. To avoid receiving two layers of management fees in situations where clients invest in Affiliated ETFs through SMA and Platform accounts, WBI will either: (i) waive the management fee at the account level; or (ii) credit the management fees paid by the Affiliated ETFs to WBI and its affiliates with respect to an account's investments in Affiliated ETFs against the account-level advisory fees the account owes WBI, and 2) WBI's affiliated broker-dealer, Millington Securities, Inc., receives commissions and other compensation (including order flow payment) for transactions effected on behalf of Affiliated ETFs. Trades WBI places through Millington will be subject to WBI's duty of best execution and applicable law.

Net of Fee Performance (NFP) is net of WBI's investment management fees and includes reinvestment of dividends and other earnings. Both NFP and Gross of Fee Performance (GFP) were restated effective February 28, 2017, to reflect the exclusion of management fees paid by the Affiliated ETFs to WBI held through the WBI Enhanced SMA® accounts which resulted in understating GFP, and as a result, NFP. Additional information is available upon request.

Risk-Reward Ratio: measures the amount an investor stands to lose if the investment moves in an unexpected direction divided by the amount they expect to gain.

Russell 3000 Value Index: comprised of Russell 3000 companies with lower predicted and historical growth rates.

Benchmark performance does not include deductions of transaction and custodial charges or investment management fees, which would likely reduce performance results. Because the strategy involves active management of a potentially wide range of assets, no widely recognized benchmark is likely to represent performance of any managed account. WBI managed accounts may own assets and follow investment strategies which cause them to differ materially from the composition and performance of the benchmarks shown. Indices are unmanaged and may not be invested in directly.

WBI's Tactical Balanced and Tactical Dividend Growth Strategies are two of six separately managed account strategies currently offered by WBI. Other strategies may have different results.
